

Powering the future of lighting.

Imagine a business landscape where you could get all of your lighting system components from one source. Lamps, ballasts, drivers, transformers. All with leading-edge technology, intelligence and efficiency. All from a name that you trust.

At GE, we're making this vision a reality, with a diverse offering of lighting system components such as GE Lightech™ LED Drivers and Halogen Transformers. Next-generation power supplies for your systems, available from the same source as your lamps and ballasts. Less time spent on purchasing. More time made for imagining new, innovative lighting systems that sell. That's what we want for our customers.

To order your GE Lightech LED Drivers or Halogen Transformers today, contact your independent lighting retailer.

Visit gelighting.com/lightech for more information.

GE Lightech™ LED Drivers and Halogen Transformers

GE Lightech™ Drivers and Transformers

More complete lighting solutions from a name you trust.

One of the most trusted names in lighting is now powering even more innovative lighting solutions. We've combined our leadership, knowledge and experience to bring you effective, reliable GE Lightech™ LED Drivers and Halogen Transformers. Create next-generation lighting systems that push the boundaries of performance and redefine efficiency. Plus, you'll receive the convenience and ease of getting your drivers and transformers from the same source as your lamps and ballasts.

Key applications include signage, architectural, downlight, track lighting and much more.

Full Phase Control Dimmable Drivers

- Dimmable with most LEADING EDGE (Triac) and TRAILING EDGE (ELV) dimmers
- Deep dimming to 1%
- Wide power range (4-36W)
- High power factor
- Efficient
- Side Lead and Bottom Feed versions available
- cULus Recognized, Class 2, 47 CFR Part 15, Class B (Consumer)

Trailing Edge Dimmable Drivers

- Dimmable with TRAILING EDGE (ELV) dimmers
- Dimming to 10% (25% for EU version)
- Wide power range (4-36W)
- Universal input voltage (120-277V)
- High power factor
- Highly efficient
- Side Lead and Bottom Feed versions available
- Small case size
- cULus Recognized, Class 2, 47 CFR Part 15, Class B (Consumer)

Low-voltage Halogen Electronic Transformers

GE Lightech™ transformers offer outstanding dependability and efficiency, from smarter technology to longer life cycles, and everything in between. Features include:

- Utilizes a unique Auto-Thermal Regulation process – proportional dimming of output voltage over 90° C
- Self-preserving 125° C Thermal Cut-off
- Embedded technology to run cool with higher efficiency – 95% at full load
- Triac dimmer compatibility – will not produce acoustic noise
- Field-effect transistors – resulting in higher efficiency, smaller size and longer life than products with bipolar transistors
