Amalgam Technology

All reflectors feature soft light for diffuse downlighting

Improved smaller size makes these compact reflectors perfect for retrofitting

Dimming reflectors will provide high quality performance in a glass reflector

Genura® reflectors offer the longest rated life and high lumen performance utilizing an electrodeless design.

All Reflectors are ENERGY STAR® qualified (except the pink reflectors & Alum PAR38)

Decorative Shapes

Providing more compact fluorescent lighting options for decorative applications

Amalgam Technology

GE offers a wide variety of shapes to expand the application of compact fluorescent lamps

Candle shaped CFL's are available in both medium and candelabra base

Familiar A-line shape is offered in several wattages

All medium based decorative shape CFL's are Energy Star® qualified

GE Consumer & Industrial Lighting

GE Compact Fluorescent Lamps

Outstanding energy efficiencies

Long Life

Screw-in base, self-ballasted

Warm, pleasing incandescent-like color

Quality color rendering

Flicker-free start

Reliable starting to as low as -10° F

GE quality and reliability throughout

ENERGY STAR® Rated

imagination at work

Next Generation Spiral® - T2 Lamps

Extra small Size with Big energy savings

Extra small size – some even smaller than their incandescent equivalent

Huge Energy Savings

Extra Long Life – 12,000 hours

Quality Color Rendering

All GE T2 CFL lamps are Energy Star® qualified
